| Exercise                      | Dimension | Unit                     | Learning Objectives                          | Page |
|-------------------------------|-----------|--------------------------|--|------|
| 1 5-digit numbers             | Number    | 5-digit numbers          | ◆ Recognise 5-digit numbers                  | 4    |
| 2 Kilometre                   | Measures  | Kilometre and millimetre | ◆ Recognise kilometre                        | 6    |
| 3 Millimetre                  |           |                          | ◆ Recognise millimetre                       | 8    |
| 4 Multiplication (1)          | Number    | Multiplication           | ◆ 2-digit numbers $\times$ 1-digit numbers   | 10   |
| 5 Multiplication (2)          |           |                          | ◆ Solve problems                             |      |
| 6 Second                      | Measures  | Time                     | ◆ 3-digit numbers $\times$ 1-digit numbers   | 12   |
| 7 Time interval               |           |                          | ◆ Multiplication of 3 numbers                |      |
|                               |           |                          | ◆ Solve problems                             |      |
| <b>Formative Assessment 1</b> |           |                          |  | 18   |
| 8 Division (1)                | Number    | Division                 | ◆ 2-digit numbers $\div$ 1-digit numbers     | 22   |
| 9 Division (2)                |           |                          | ◆ Solve problems                             |      |
| 10 Weight                     | Measures  | Weight                   | ◆ 3-digit numbers $\div$ 1-digit numbers     | 24   |
| 11 Gram and kilogram          |           |                          | ◆ Division of 3 numbers                      |      |
|                               |           |                          | ◆ Solve problems                             |      |
|                               |           |                          | ◆ Measure and compare the weights of objects | 26   |
|                               |           |                          | ◆ Recognise gram and kilogram                | 28   |

| Exercise                           | Dimension       | Unit                              | Learning Objectives                                      | Page |
|------------------------------------|-----------------|-----------------------------------|--|------|
| 12                                 | Shape and space | Parallel lines and quadrilaterals | ◆ Recognise the concept of parallel lines                | 30   |
| 13                                 |                 |                                   | ◆ Recognise the concept and properties of parallelograms | 32   |
| 14                                 |                 |                                   | ◆ Recognise the concept and properties of trapeziums     | 34   |
| 15                                 | Measures        | 24-hour time                      | ◆ Recognise the 24-hour time                             | 36   |
| <b>Formative Assessment 2</b>      |                 |                                   |  | 38   |
| <b>Summative Assessment</b>        |                 |                                   |  | 42   |
| <b>Challenging Common Mistakes</b> |                 |                                   |  | 52   |
| <b>Glossary</b>                    |                 |                                   |  | 55   |

### Includes:

- Unit Test 5-digit numbers
- Unit Test Kilometre and millimetre
- Unit Test Multiplication
- Unit Test Time
- Unit Test Division
- Unit Test Weight
- Unit Test Parallel lines and quadrilaterals
- Unit Test 24-hour time
- Answer Key
